

rethinking possible

Becky Galli's 1960s southern upbringing was idyllic—until her brother died in a waterskiing accident at seventeen, and the slow unraveling of her perfect family began. In the years that followed, she forged onward with her life plans: marriage, career, and raising a family of her own, one she hoped could be like the one she knew before her brother's death. But life did not go according to plan. There was her son's illness and subsequent death; her daughter's autism diagnosis; her separation; and then, nine days after the divorce was final, the onset of the transverse myelitis, a rare inflammation of the spinal cord that would leave Galli paralyzed from the waist down.

At once heartbreaking and inspiring, *Rethinking Possible* is a story about the power of love over loss and the choices we all make that shape our lives— especially when we're forced to confront the unimaginable.
